Hi Andrea,

I have some amazing news. **We're now ready to go ahead with the panel.**

What we would like you to do

- Build us an Agent and present it to us
- The agent does not have to work end-to-end. It can be half-finished, brittle, or fail live in front of us. That is not what we are evaluating.
- What we are evaluating is your method: how you framed the problem, why you chose this shape of solution, which model and tools you reached for and why, how you thought about boundaries an guardrails, what you learned when things broke, and what you would do next.
- A working demo is a bonus. I think that a clear, honest walk-through of your reasoning is the point.

Bring us:

1. The problem you decided to solve, and for whom.
2. The agent you built to solve it, whatever state it is in.
3. The choices you made, the ones you rejected, and why.
4. The failure modes you hit and what they taught you.

Could you show us how you think? The rest is detail. Panel brief PDF attached below.

- **Panel Buddy: Attilio Capocchiani.** Who can be reached at acapocchiani@salesforce.com to book a preparation call. **He's cc'd on this email**

Interviewers:

- **FDE/ Peer:** potentially (Miguel Fonseca OR Carlos Hernandez, etc, we'll confirm asap)
- **FDE OU Lead:** Veronica Pillon
- **FDE Country Manager:** Piero Ponteggia
- ***Optional:*** **SE Lead:** Nicola Lalla

We can also sync beforehand if I can help prepare in any way and discuss prior feedback: https://calendar.app.google/kgVHLvPNRBAi7UfWA

Attaching here also a Corporate Deck for your reference, as you build your slides: https://docs.google.com/presentation/d/1BpnMKkfwHTKpmaBJhyZiOknOkQY_3Sm8/edit?slide=id.p1#slide=id.p1 -> you need a Gmail account to access it as it's on Google Slides.

So excited for you!

Warm regards,
Bianca
